Device: Possible conflict vs. Bella of Eastmarch (Badged reg. 06/1976) “Gyronny sable & argent, a dragon rampant gules, armed and webbed Vert.” Aryanhw comments that there is one CD for the field but none for armed or webbed. Commenters present noted that if the armed and webbed portion is 50% of the monster then there might be sufficient difference to have another CD.

“Changing the tincture of the wings on a winged monster is generally considered to be changing half the primary charge group and therefore granted a CD by standard interpretation of RfS X4d.”

The precedent for this interpretation dates from the September 1990 LoAR.

Therefore, this is clear.

Submit to Laurel for ruling.
